

Transportation Services

for People with HIV

What are Transportation Services?

Transportation Services is a program that is available to people living with HIV (PLWH) and their immediate family members (when they accompany the client to access services) who need transportation to medical and social services appointments.

What is the goal of the Transportation program?

The goal of Transportation Services is to make sure that you are able to get to your primary health care and related social service provider appointments.

What services can I access through the Transportation program?

The Transportation program offers services for clients that may be eligible for monthly bus or Metro passes, taxi services, ride share services (Uber, Lyft), and van transportation services.
