

# Gonorrhea by Unified/Union School District

2015 case counts among adolescents aged 15-19 years old

# Disclaimer text enlarged

Data are provisional due to reporting delay. Case counts reflect adolescents aged 15-19 years old who reside within the boundaries of each school district, but may not necessarily attend schools in that area.

Case distribution includes cases from the cities of Long Beach and Pasadena.

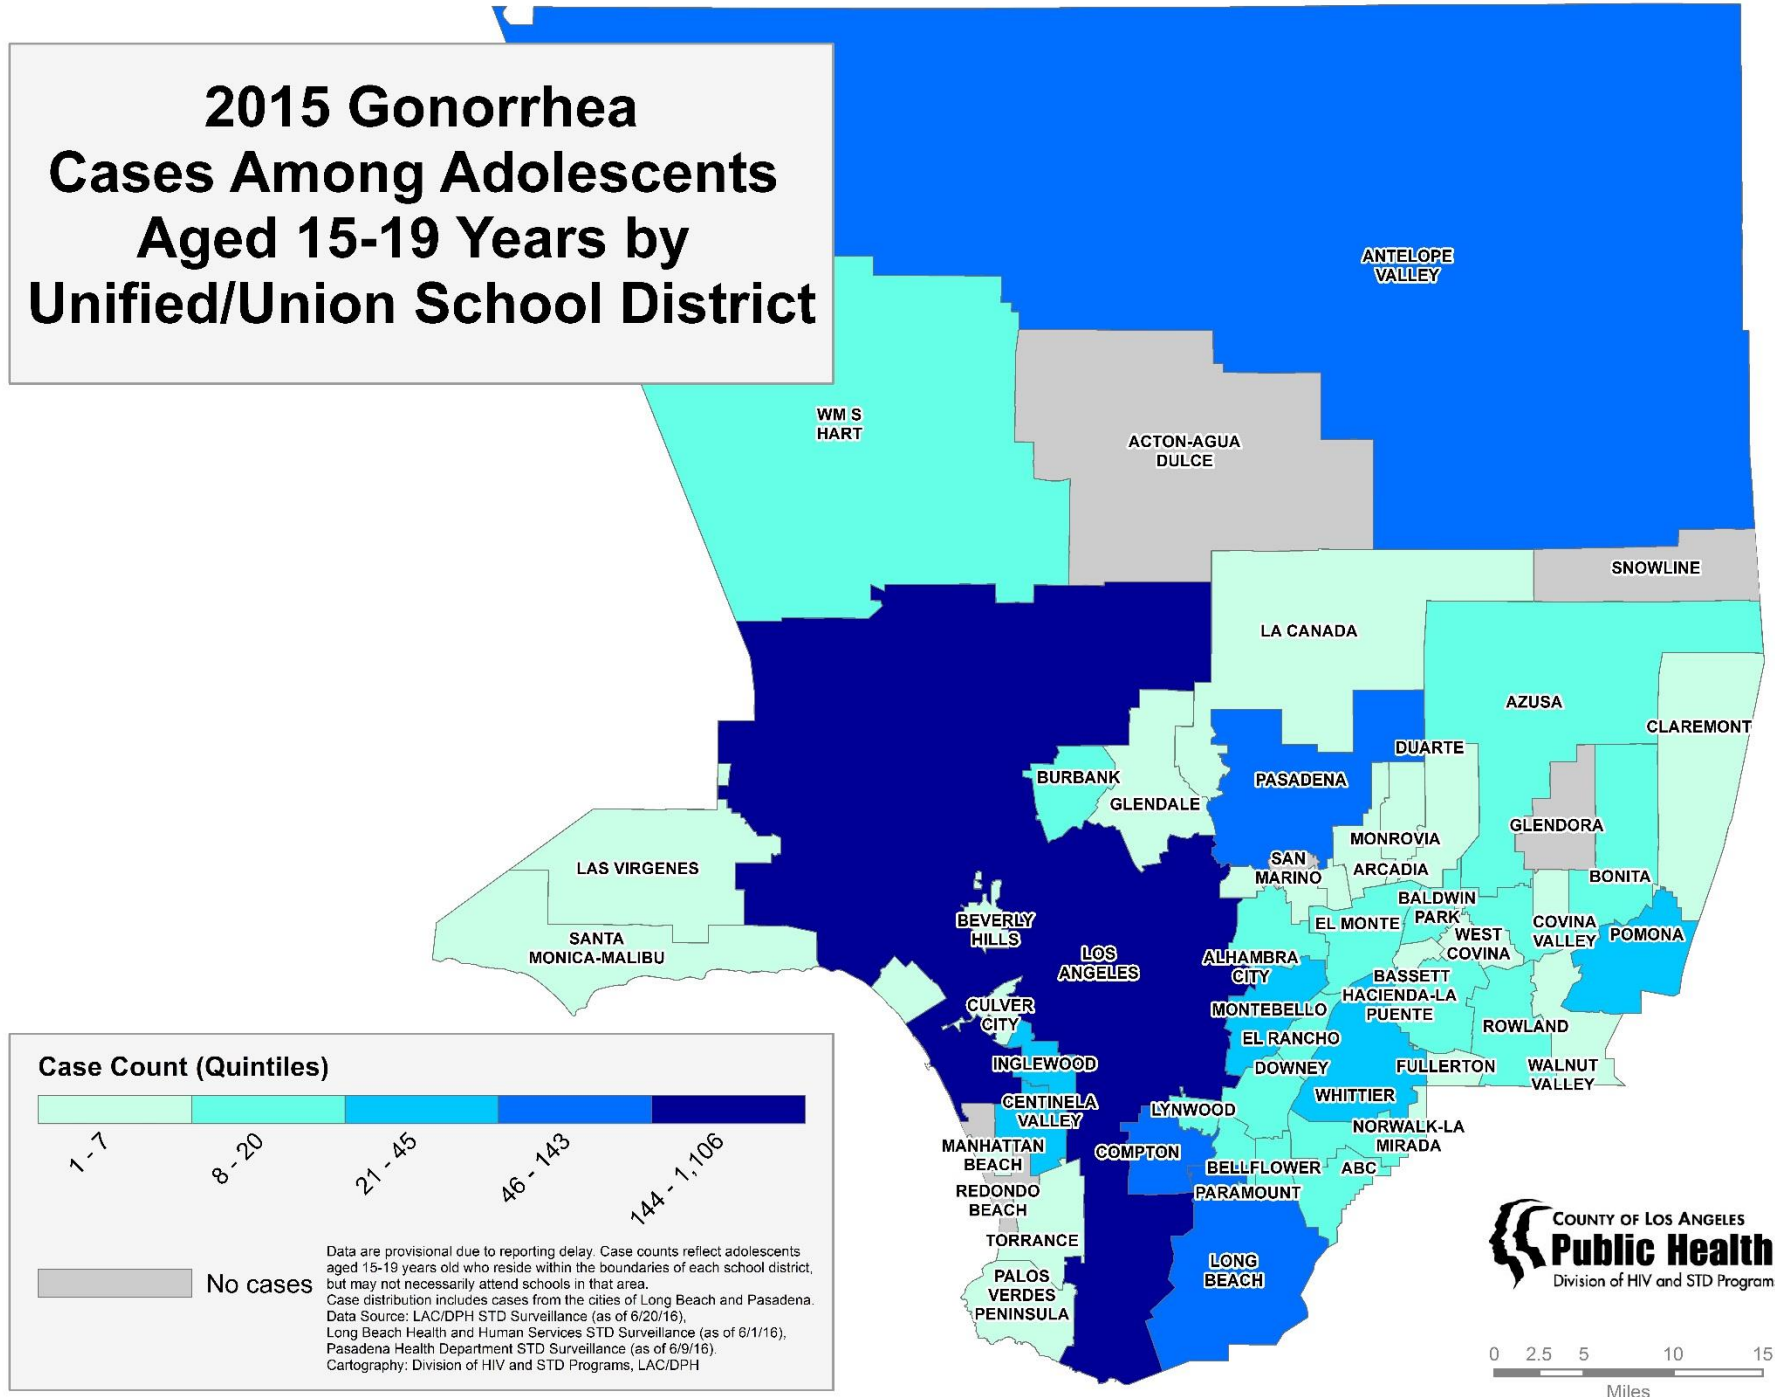

Data Source: LAC/DPH STD Surveillance (as of 6/20/16),

Long Beach Health and Human Services STD Surveillance (as of 6/1/16),

Pasadena Public Health Department STD Surveillance (as of 6/9/16).

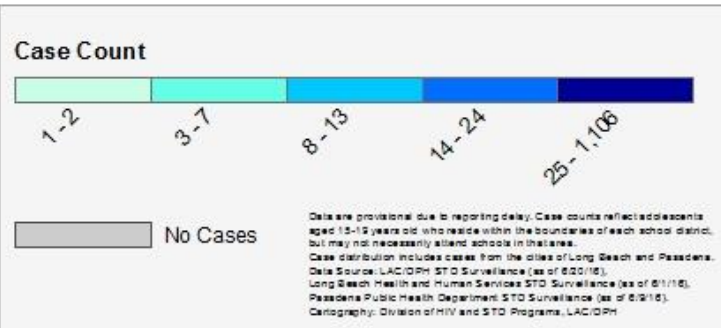

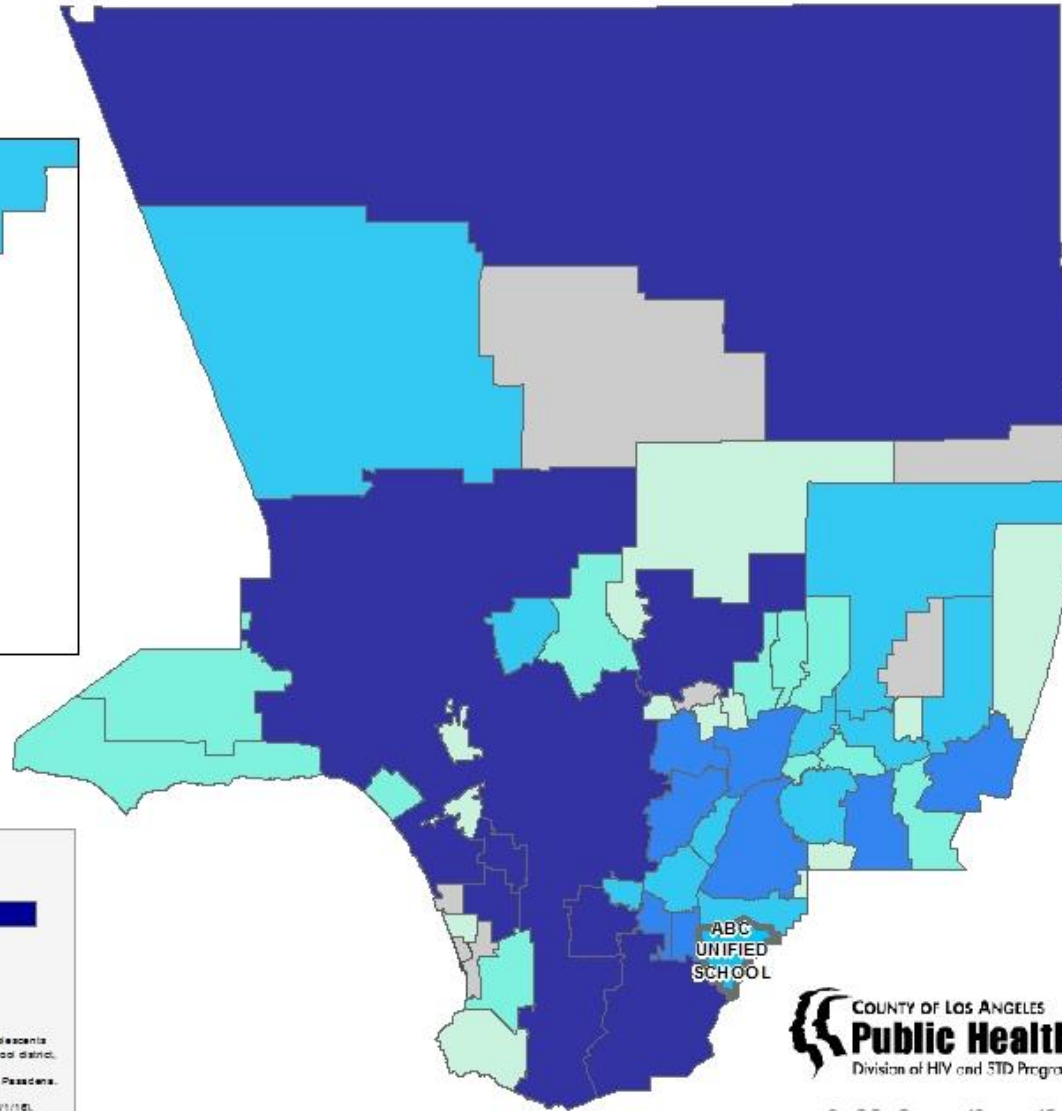

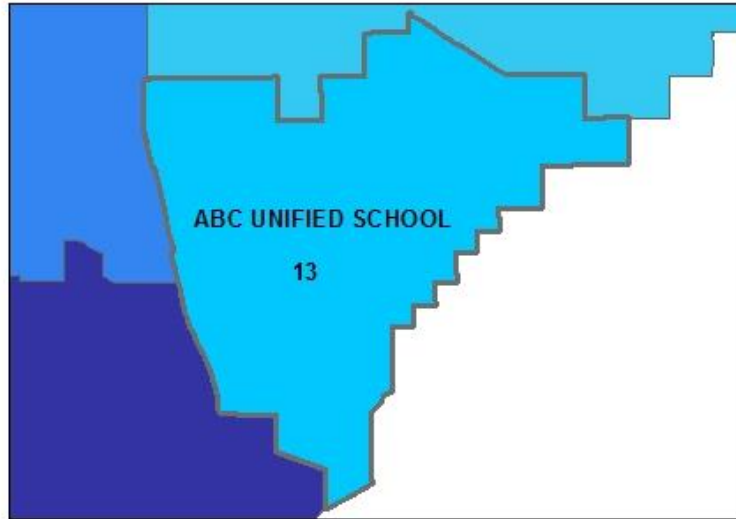

Cartography: Division of HIV and STD Programs, LAC/DPH
