

# The Health of Our Communities Begins in Our Schools!

Everyone plays a role in preventing illness by encouraging healthy habits and taking responsibility for their own health.

The award winning Schools' Toolkit and Online Training Program are valuable educational tools and dynamic communication resources provided FREE for schools, school districts and our greater communities.

## Schools' Toolkit

[www.laschooltoolkit.com](http://www.laschooltoolkit.com)

The Toolkit provides useful public health and disease-related tools and information that are accurate and vetted by the LA County Department of Public Health. It contains "best of" resources for over 15 of the top infectious diseases in schools, as well as other relevant diseases and outbreaks.

### Key Highlights:

- Fully customizable pre-approved Preparedness and Response Letters for parents, students, staff and administrators
- Sample emergency preparedness plans and checklists
- Disabilities and/or Access & Functional Needs resources including checklists, planning guides and "Community and School Skill Routines"
- Public health emergency reporting protocols
- Thousands of resources available in multiple languages and formats such as posters, presentations and flyers
- Videos, Vaccination Resources AND MUCH MORE!

## Online Training Program

[www.laschoolhealth.com](http://www.laschoolhealth.com)

The Online Preparedness Training Program for Schools and Communities encourages learning about disease prevention and preparedness.

Award winning videos and online courses present factual information in an entertaining manner to encourage learning on a variety of public health topics and issues affecting schools and our greater community.

### Key Highlights:

- Online training courses allow for self-paced learning and study. They're quick, easy and fun!
- Animated videos of all courses available for download for playing in homes, classrooms, waiting rooms, etc.
- Encourages healthy habits and dispels myths and misinformation about some common diseases in schools.

### Course topics include:

- ✓ The Flu: Basic tips for staying healthy
- ✓ Understanding MRSA
- ✓ Disease reporting made simple
- ✓ Flu preparedness for childcare providers
- ✓ Myths and facts about flu vaccination
