

MOBILE VACCINE & TESTING TEAM

ANNUAL REPORT

FY 2025-2026

FALL RESPIRATORY VACCINE CAMPAIGN

Sept–Dec 2025

During the Fall Respiratory Vaccine Campaign:

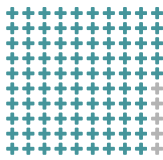

The MVT team and pharmacy partners administered

25,017 
respiratory virus vaccines

Primarily reached seniors and people experiencing homelessness (PEH)

Accounted for

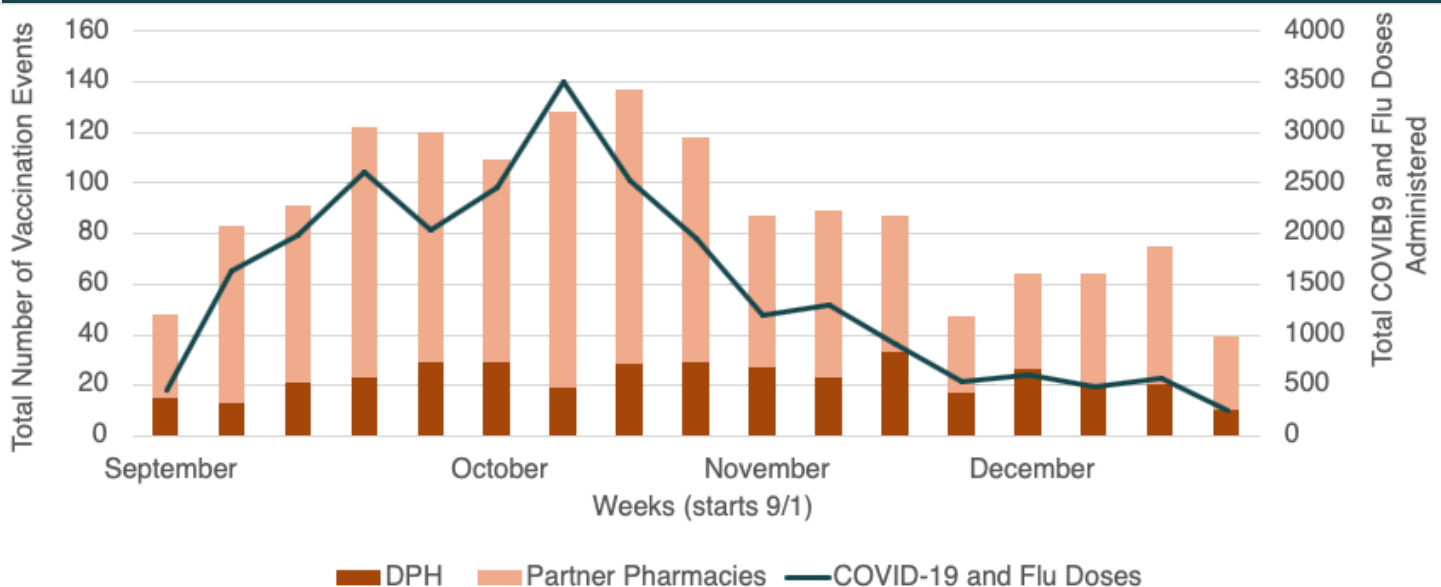

94% 
of all respiratory virus vaccines administered in FY 2025–26

The Los Angeles County Department of Public Health's Mobile Vaccine and Testing (MVT) team has served communities across LA County since 2021 by bringing lifesaving vaccines directly to places where people live, work, play, and pray.

Across the full fiscal year (FY 2025–2026), the MVT program supported 1,959 vaccination events and administered 26,606 total COVID-19 and influenza vaccine doses countywide.

Figure 1 shows the weekly vaccination events conducted by the DPH nursing team and pharmacy partners, as well as the total number of COVID-19 and influenza vaccine doses administered per week between September 1 and December 31, 2025.

Figure 1. Weekly vaccination events by vaccinator and total COVID-19/influenza vaccine doses administered, September 1–December 31, 2025

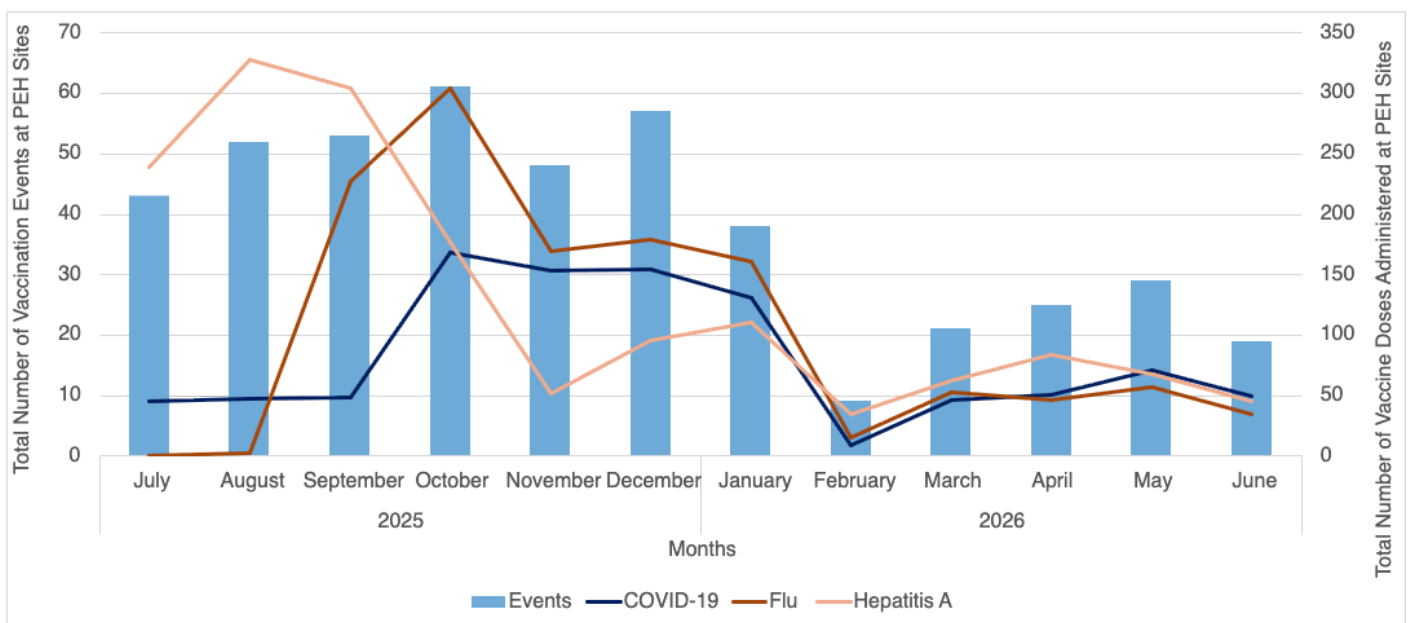

OUR WORK WITH PEOPLE EXPERIENCING HOMELESSNESS (PEH)

The MVT nursing teams led vaccination events specifically aimed at reaching people experiencing homelessness (PEH) to ensure continued access to vaccines and harm reduction services. Events were held at various locations throughout the county, including encampments, shelters, libraries, transit stations, and other community-centered spaces.

3,529 harm reduction services delivered

FROM THE COMMUNITY

We interviewed members of the community we served, and they shared the following:

Kristopher appreciates that people are willing to “step out” [to bring services] to help people others. He trusts that our services are intended to protect him.

Kristopher’s message to others is: ***“I’m sorry you’re going through what you’re going through, and I hope things get better. Love yourself and know I love you too.”***

Mr. Reginald chooses to get vaccinated to protect himself and as a form of prevention. He is glad for the services [MVT offers] because they help him stay healthier.

Mr. Reginald’s message to others is: ***“Humble yourself and persevere through your situations; Follow the criteria, save your money, work on growth, and stay focused.”***

Site Satisfaction

Planning Process

Services Provided

After vaccination events are completed, sites receive a survey to rate the MVT team’s planning process and services provided, using a scale ranging from “very dissatisfied” to “very satisfied.” On the left, we see the percentage of sites that reported being “very satisfied.”

TEAM HIGHLIGHT

Daniel Newell

Deputy Director

Daniel loves that his job is different every day and has the opportunity to interact with a wide variety of teams. His fondest experience working with partners was during the Hepatitis A outbreak in the county. MVT worked directly with outreach teams and a number of street medicine teams and brick and mortar facilities who directly provided hepatitis A vaccinations. These partners were integral to MVT's vaccination campaign and their efforts were crucial in controlling the spread of hepatitis A. Daniel shares that he "is struck by how well the [MVT] team has adapted to change such as serving new populations, providing new services requiring complex planning efforts, and responding to a number of outbreaks. **The team has been excellent in meeting each of these needs, paving the way for safer and healthier communities in LA County.**"

Meydin Murillo-Tercero

Public Health Nurse

Meydin leads a team of nurses who administer both routine and specialty immunizations across all age groups, tailoring techniques to meet the needs of diverse populations. One of the aspects she values the most about working with MVT is the strong sense of unity and collaboration. She shares, **"our willingness to support one another enables us to deliver efficient, high-quality care to our clients, whose well-being is always our top priority."** I also appreciate our partnerships and community organizations, such as The People's Concern who provide compassionate support and valuable resources to our PEH clients. Their commitment and expertise greatly enhance the work we do; Our partnerships are an invaluable asset to our efforts in the community."
