- LA County Vaccine-Preventable Disease (VPD), Influenza, and COVID-19 Surveillance Updates;
- Featured Presentation: “Lessons Learned from a Street Medicine Vaccination Pilot”
- Q & A

ICLAC Work Group Updates

July 9, 2020

Pediatric and Adolescent Work Group

ICLAC Pilot Program

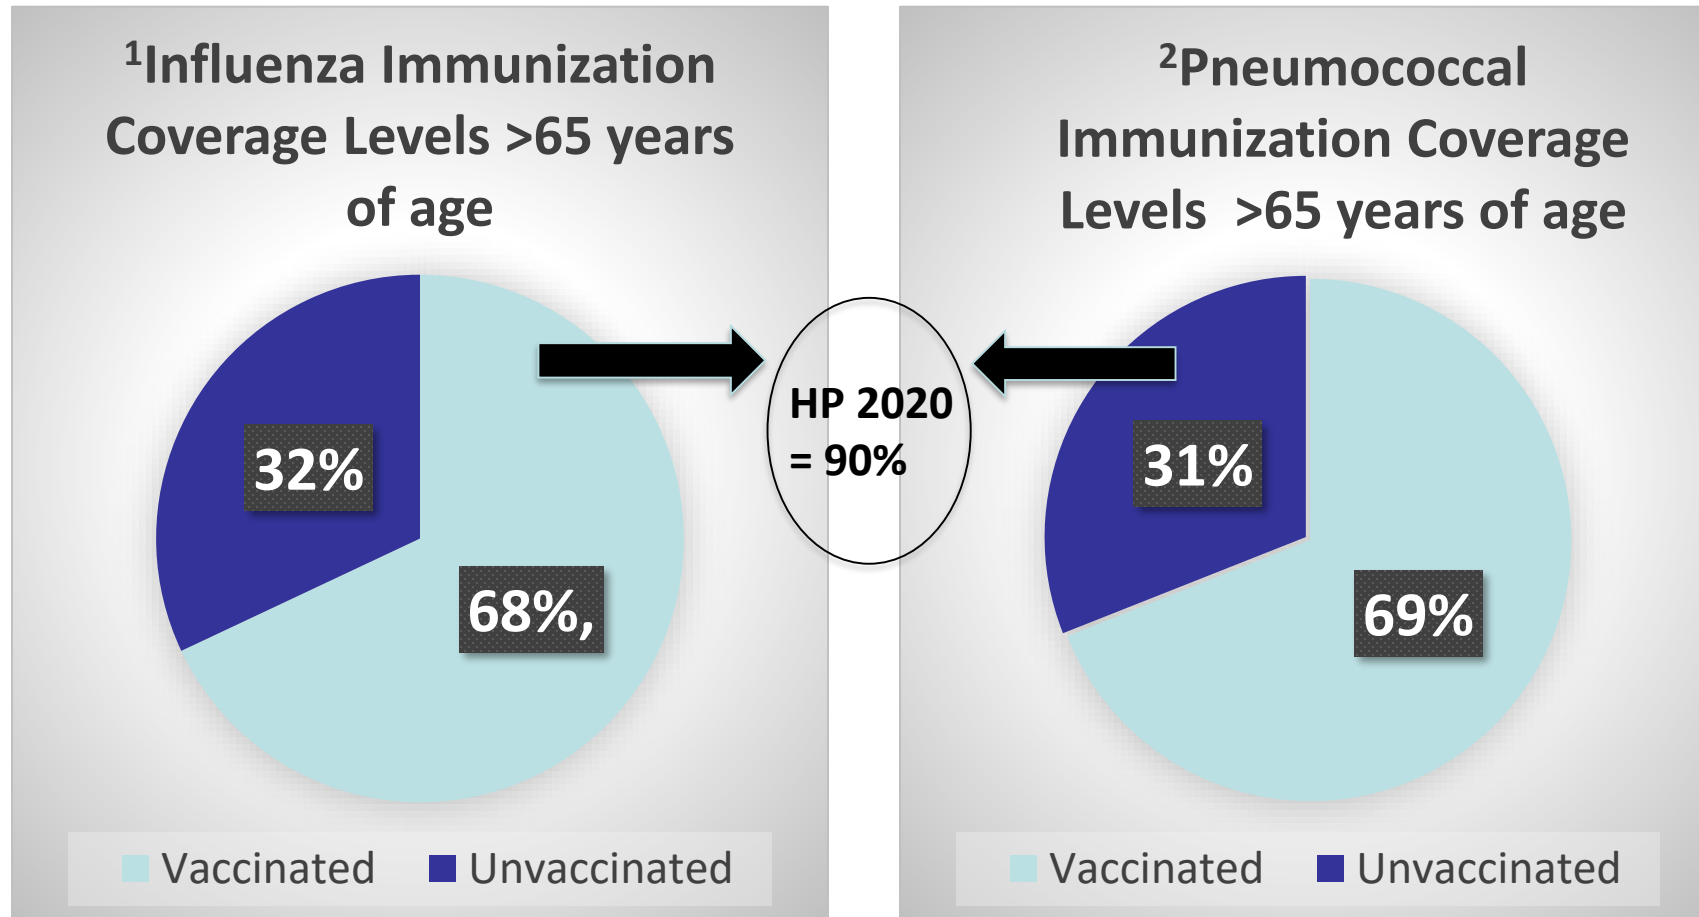

- Pediatric and Adolescent Work Group Members identified additional methods for Providers to recall large groups of patients via Phone or Text.
- Recall Program in collaboration with ICLAC, Call-Em-All, Sanofi Pasteur, and HealthNet.
- HealthNet Care Gap Lists created in Excel format to expedite recall efforts for Providers.
- Despite the COVID-19 Pandemic, several providers implemented Call-Em-All's WellConnect Program to reach Pediatric and Adolescent Patients.

Adult Work Group

Flu and Pneumococcal Immunization Disparities among Adults over 65 yrs

¹CDC.Gov – Influenza Coverage - Season 2018-2019

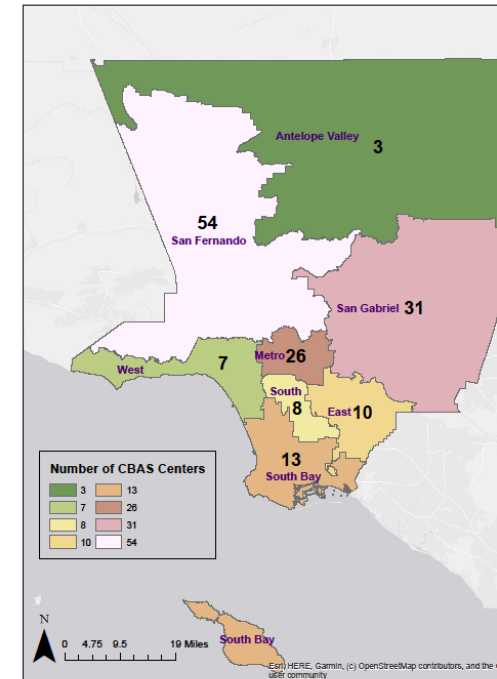

²CDC.Gov – Pneumococcal coverage rates 2017

Los Angeles County Community Based Adult Services (CBAS) Baseline Survey

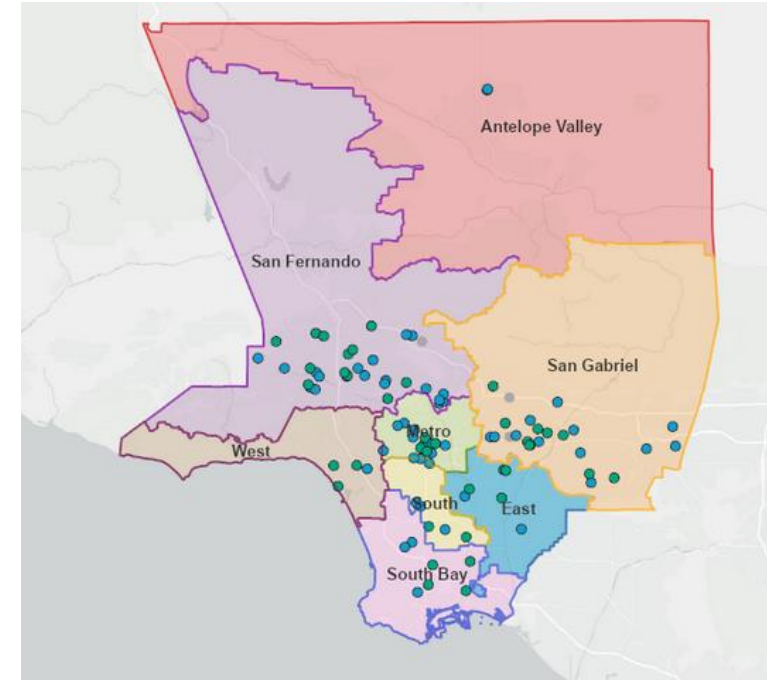

- **Goal:** To expand access to influenza and pneumococcal immunizations for elderly, chronically ill CBAS participants and the staff providing rehabilitation services.
- **Objective:** To systematically assess the immunization policies and practices at 149 Los Angeles County CBAS facilities with 23,000 enrolled participants.

Number of CBAS Centers in Each Service Planning Area

Phase I: Survey Results

- 66% completed surveys: **n= 101**
- 58% do not assess influenza status
- Barriers reported:
 - Lack of time (7%)
 - Lack of training (21%)
 - Not CBAS responsibility (21%)
- 65% -> had no staff vaccination policies
- 33% -> responded they could add flu vaccination status at the intake process;
- 42% -> were moderately to very interested in an external vendor coming on site to administer flu and pneumococcal vaccinations.
- 47% -> were moderately to very interested in an educational offering.

Phase II: Intervention Plan (n=41)
