

# LOVE Your Baby's Teeth

## Campaign Toolkit

Funded by the Office of Oral Health, CDPH under Contract 17-10698

# About the Campaign

In February 2021, the Los Angeles County Department of Public Health (Public Health) launched a media and public education campaign to give parents advice on how to care for their children's baby teeth and lay the foundation for their babies' dental health as they grow with a healthy routine at home.

Public Health's awareness campaign encourages parents to take three simple actions to safeguard their baby's dental health from day one:

- Even before the first tooth comes in, clean your baby's gums with a washcloth after feeding;
- Brush your baby's teeth twice a day with a soft toothbrush and just a smear of fluoride toothpaste, the size of a grain of rice; and,
- Start visiting the dentist every 6 months by the time your baby turns one or when the first tooth appears.

Public Health's public awareness and education campaign developed creative materials in English and Spanish that introduced three lovable and memorable Mouth Monsters who were designed to reach parents and caregivers of children ages 0-5 and generate excitement and awareness about important dental health messages. The effort included advertisements on television, radio, online, social media, grocery stores, bus shelters, and pediatricians' offices. Many of the designed elements created for the campaign are being made available to partners and stakeholders through this toolkit.

# Meet the Mouth Monsters

The Mouth Monsters are a family of memorable characters with individual jobs to oversee and encourage the healthy dental care of children at every early stage of development.

**Gumster** is the baby of the group. Like your typical baby, she's a bit of a diva and will certainly let you know if she doesn't like something. However, she's a great sport about getting her gummy mouth wiped clean and actually looks forward to it! She's trying to keep it real and keep fresh. Open wide, it's gum wiping time!

**Brushter** is the young monster who is absolutely bursting with energy. He certainly brings the enthusiasm for brushing teeth. He has a giant, flying toothbrush that he uses to visit children and show them how to keep those chompers clean. While he's rambunctious and can usually be seen moving around and dancing, he always has a big bright smile showing off his healthy teeth.

**Toothster** is the calm and collected dentist. Her tentacle limbs can confidently deliver dental care even when she's cooing at babies to keep them calm. But apart from just being a good multitasker, our dentist brings a cool authority to the subject of dental health and is here to give kids and parents the info they need.

## English :30 Song Ad

Wipe Gums

Brush Teeth twice a day

Take them to the dentist

YEAH, right away

Love your baby's teeth that's what we say

Keep 'em nice and clean from the very first day

**GUMSTER:** After feeding, wipe those gums

**BRUSHSTER:** Got a tooth, brush it clean

**TOOTHSTER:** Take 'em to the dentist by the time they turn one!

Love your baby's teeth that's what we say

**VO:** To learn more visit Choosehealthla.com. Brought to you by the Los Angeles County Department of Public Health.

## English :15 VO Ad

Love your baby's teeth.

Before that first tooth, wipe their gums with a washcloth.

When those first teeth come in, use a soft toothbrush and a just a tidbit of toothpaste.

And, take them to the dentist by their first birthday.

Learn more at ChooseHealthLA.com.

Sonrisa brillante, desde la infancia en adelante

Cuidar los dientes y las encías de tu bebé es fundamental para la salud de su boca por vida.

Antes de que salga el primer diente, limpia sus encías con una toallita después de comer.

Luego, cuando salgan los primeros dientes, usa un cepillo suave para niños con solo un poquito de pasta dental.

Y haz una cita dental cuando le salga el primer diente o para cuando cumpla un año.

Aprende más en choosehealthla.com. Un mensaje del Departamento de Salud Pública del Condado de L A.
