Self harm injuries and suicide attempts treated in hospitals were identified as recommended by the Council for State and Territorial Epidemiologists: <https://resources.cste.org/Injury-Surveillance-Methods-Toolkit/Home/GeneralInjuryIndicators>

\* All rates are per 100,000 population, and except for age groups, rates are age adjusted to the 2000 US population.

\*\* We recognize that Asians and Native Hawaiians and Pacific Islanders are separate races. However, until 2019 these populations were reported as a single group by the data provider. In future updates of this table we will be able to report information separately for these populations.

- Rates were not calculated for other/unknown populations.
