Alcohol and Drug Program Administration

Annual Review of Participants in Alcohol and Drug Programs
Contracted by the
Alcohol and Drug Program Administration
2003-04 Fiscal Year

Executive Summary

The ninth Annual Review is a comprehensive description of the participants who received various types of services from alcohol and drug programs contracted with the Los Angeles County Alcohol and Drug Program Administration (ADPA) during the 2003-04 Fiscal Year. Information presented in the Annual Review is obtained from the Los Angeles County Participant Reporting System (LACPRS) an ongoing standardized reporting system which is sustained by a close working relationship between ADPA and contracted alcohol and drug program providers. Each month program providers obtain and submit participant admission and discharge information. Research and Evaluation, a section within the Planning Division, uses this information to prepare the Annual Review and other reports.

ADPA-Contracted Alcohol and Drug Treatment/Recovery Programs

Admissions Overall:

During the 2003-04 Fiscal Year, ADPA contracted with 152 community-based agencies. These agencies provided services to a total of 53,892 participants who accounted for 67,811 treatment/recovery program admissions. Since a participant may be admitted to more than one program during a fiscal year or return to the same program more than once, the number of admissions is usually greater than the number of individual participants. The number of program admissions and individual participants has increased over three fiscal years (2001-02 to 2003-04), 32% and 27%, respectively.

Participant Characteristics:

From 2001-02 to 2003-04 Fiscal Years, the demographic characteristics of treatment/recovery participants have been relatively constant. Most participants were male, most were between 25 and 44 years of age, and most reported completing 9 to 12 years of education. From 2001-02 to 2003-04, the primary drug problem reported by most participants was alcohol, methamphetamine, or cocaine/crack. One notable change in the primary drug problem reported by participants over these three fiscal years has been the steady increase in methamphetamine use.

Table 1 presents the overall demographics of participants served by ADPA-contracted treatment/recovery programs for the 2003-04 Fiscal Year.

Table 1 – Program Participants By Key Demographics
2003-04 Fiscal Year*

Characteristics	Number	Percent
Participants	53,892	100.0
<u>Gender</u>		
Male	35,808	66.4
Female	18,084	33.6
<u>Race/Ethnicity</u>		
White	15,593	28.9

Methamphetamine	11,399	21.2
Other	2,506	4.7

*Percents in this report do not always sum to 100% due to rounding

During the 2003-04 Fiscal Year, Latinos (40.2%), Whites (28.9%), and Black/African Americans (24.8%) accounted for 94% of all participants involved in treatment/recovery programs. Unemployment was high among participants (82.1%) and 18.8% of the participants reported being homeless. The primary drug problem reported by most participants was methamphetamine (21.2%), alcohol (21.1%), cocaine/crack (19.5%), heroin (17.0%), or marijuana/hashish (16.6%). One out of 5 (10,936 or 20.3%) participants reported using needles to administer drugs. Five percent (930 of 18,084) of female participants reported being pregnant.

Special Treatment/Recovery Programs

ADPA contracts with alcohol and drug treatment/recovery agencies to provide services for specialized programs. These special programs were designed to address specific needs of certain populations such as adolescents, general relief recipients, pregnant and parenting women, and criminal justice defendants. The Substance Abuse and Crime Prevention Act of 2000 (also known as Proposition 36) program and participants are discussed in a detailed report, "Proposition 36 Annual Report 2003-2004" and can be access on ADPA's website, <http://lapublichealth.org/adpa>.

Following is a description of the special programs covered in this report:

❖ Adolescent Intervention, Treatment, and Recovery Programs

Adolescent programs provide screening, assessment, case management, outpatient and residential services for youth ages 12 to 21 years of age. ADPA contracts with a network of community-based agencies with specific expertise in providing these services using culturally and developmentally appropriate approaches. The service providers also possess the capacities to address the needs of youth with co-occurring mental health and substance abuse problems and of youth involved with the juvenile justice system. The service providers work closely with the Juvenile Court, the Probation Department, schools, and other youth-serving organizations to coordinate services for the youth and their families.

❖ California Work Opportunity and Responsibility to Kids Supportive Services

When California adopted the national welfare reform program known as Temporary Assistance to Needy Families (TANF), the State Legislature voted to rename California's welfare reform program California Work Opportunity and Responsibility to Kids (CalWORKs). Under the CalWORKs program, counties may provide additional supportive services to participants including mental health, domestic violence, and substance abuse treatment. These services are designed to remove potential barriers for participants trying to obtain and retain employment.

Participants are pre-screened by Department of Public Social Services staff during CalWORKs intake to determine if there is a possible substance abuse problem. Participants identified with a possible alcohol or other drug problems are referred to ADPA-contracted Community Assessment Services Centers (CASC) for a clinical assessment.

Participants identified with alcohol or other drug problems by CASC are encouraged to participate in a treatment and recovery program. ADPA's network of alcohol and other drug treatment/recovery programs provide services for CalWORKs recipients. Participation in these supportive services is considered a part of the welfare-to-work plan. The time spent in substance abuse treatment and recovery services normally satisfies the participant's weekly program requirement for work or job training and related activities.

❖ Drug Court Treatment and Recovery Services

Drug Court is a full or part-time court that has specifically been designated and staffed to supervise non-violent drug defendants who have been referred to a comprehensive and judicially-monitored program of drug treatment and rehabilitation services. First established in Los Angeles in 1994, there are currently 13 operational adult Drug Court programs located throughout the County. The Drug Court Judge heads a non-adversarial team of court officers, defense and prosecution attorneys, and treatment counselors to support a participant's recovery through intensive supervision, drug treatment services, frequent drug testing, and court appearances.

❖ Female Offenders Project

This project represents a joint effort by the California Department of Corrections, California Department of Alcohol and Drug Programs, and ADPA. The Female Offenders Project was first implemented during the 1989-90 Fiscal Year. Female inmates from the California Institute for Women in Frontera, who are paroled to Los Angeles County, voluntarily participate in community-based residential alcohol and drug treatment/recovery for up to six months.

❖ General Relief Mandatory Substance Abuse Program

Existing State law (California Welfare and Institutions Code section 17000 et.seq) requires counties to maintain a general assistance program for indigent persons. Indigent persons are defined as adults, 18 years of age and older, who have no source of income or means of providing for their basic needs such as food, shelter, and clothing. In Los Angeles County, this program is known as General Relief. Effective November 1997, all adult applicants applying for General Relief are required, as a condition of eligibility, to be screened during their intake interview to determine if there is a reasonable suspicion that he or she may have a substance abuse problem. These individuals are referred to an ADPA-contracted Community Assessment Services Center (CASC) for a professional evaluation, and, if appropriate, for urinalysis screening. Participants assessed and identified with alcohol or other drug problems are required to participate in a substance abuse treatment/recovery program in order to continue to receive General Relief benefits.

❖ Narcotic Treatment Programs

These programs provide a range of services using methadone or levo-alpha-acetylmethadol (LAAM) medication for detoxification and/or maintenance of opiate dependent individuals. Services may include intake and assessment, body fluid testing, group and family counseling, crisis intervention, and participant follow-up.

There are two types of narcotic treatment program services.

1. Detoxification services administer or furnish methadone/LAAM in decreasing doses for a period not to exceed 21 days to assist an individual's withdrawal from dependency on heroin or other morphine-like drugs.
2. Maintenance services administer methadone/LAAM, accompanied by ancillary medical and social services, for individuals 18 years of age or older with a history of two or more failures in alternative treatment services.

❖ Perinatal Services Network

This program was developed through the collaborative efforts between the California Department of Alcohol and Drug Programs and ADPA. The Perinatal Services Network provides a wide array of alcohol and drug treatment/recovery services designed to assist pregnant and parenting women and their children in establishing and maintaining clean and sober lifestyles. Treatment and recovery options include: long-term residential treatment, day care habilitative services, outpatient counseling, case management services, transitional housing, and sober living services.

❖ The Los Angeles Area Services Network (also known as Prison Parolee Network)

The Prison Parolee Network is the result of a collaborative effort of the California Department of Corrections, California Department of Alcohol and Drug Programs, and ADPA. Male and female offenders, paroled to Los Angeles County, voluntarily participate in an ADPA-contracted alcohol and drug treatment/recovery program for up to six months. Treatment includes residential, outpatient, and alcohol/drug-free living center services.

Table 2 provides a summary of the participants who received services from these specialized alcohol/drug treatment programs for the 2003-04 Fiscal Year.

Table 2 – Special Programs by Number of Admissions, Participants, and Target Population
2003-04 Fiscal Year

Special Programs	Admissions	Participants	Target Population
Adolescent	2,423	2,284	Youth ages 12 to 21 years of age
CalWORKs	1,801	1,636	CalWorks (welfare reform) recipients with AOD* problems
Drug Court	1,795	1,511	Non-violent drug defendants
Female Offenders	89	83	Female inmates from California Institute for Women in Frontera
General Relief	5,584	5,260	General Relief (indigent adults) recipients with AOD problems
Narcotic Treatment	8,875	6,552	Opiate dependent individuals
Perinatal	1,443	1,337	Pregnant and parenting women and their children
Prison Parolee Network	708	606	Male and female offenders, paroled to Los Angeles County

*AOD – Alcohol and Other Drug

Service Planning Area:

Los Angeles County is divided into eight Service Planning Areas (SPAs). Each alcohol and drug program participant was assigned to a SPA based on his or her residential zip code. SPA statistics represent the number of residents residing in a SPA at the time of their admission into an ADPA-contracted alcohol and drug program. SPA statistics do not include program participants who were homeless at the time of admission and those residents who received alcohol and drug treatment services from programs not contracted with ADPA. These SPA statistics do not reflect the actual level of incidence and prevalence of alcohol and drug problems in a SPA.

The most frequently reported primary drug problem of participants residing in the Antelope Valley, San Gabriel, and East SPAs at the time of admission was methamphetamine. About one-third of participants who resided in the South SPA reported cocaine/crack as their primary drug problem. Heroin was the most frequently reported primary drug problem of participants from the Metro and West SPAs. For all SPAs, most participants were between 25 and 44 years of age and most reported completing 9 to 12 years of education.

Discharge Status:

The discharge status of a participant is reported at the time of program departure. One of the following four State-defined standard discharges are used by program staff to describe a participant's departure status: 1) completed treatment, 2) left before completion with satisfactory progress, 3) left before completion with unsatisfactory progress, and 4) referred/transferred for further alcohol/drug treatment/recovery.

Table 3 shows that during the 2003-04 Fiscal Year, 43,675 participants were discharged from treatment/recovery programs. Overall, about one-fourth (24.0%) of all participants "completed treatment." More than one-third (35.7%) of the participants departing from residential programs successfully completed treatment. For non-residential programs, 17.4% of the participants "completed treatment."

Table 3 – Discharge Status by Residential and Non-Residential Programs
2003-04 Fiscal Year

Discharge Status	Residential		Non-Residential		Total	
	Number	Percent	Number	Percent	Number	Percent
Completed Treatment	5,667	35.7	4,824	17.4	10,491	24.0

Annual Review of Participants in Alcohol and Drug Programs
Contracted by the
Alcohol and Drug Program Administration
2003-04 Fiscal Year

Introduction

This ninth Annual Review of Participants in Alcohol and Drug Programs Contracted by the Alcohol and Drug Program Administration (ADPA) was prepared by Research and Evaluation, a section within the Planning Division of ADPA, Los Angeles County Department of Health Services.

The Annual Review is a comprehensive description of participants who received alcohol and drug treatment/recovery services during the 2003-04 Fiscal Year. Chapters 2 through 5 provide participant demographics by special programs, target populations, Service Planning Areas, and program providers.

The majority of the information found in the Annual Review is based on data obtained from the Los Angeles County Participant Reporting System (LACPRS) which is sustained by a close working relationship between ADPA and contracted alcohol and drug program providers. LACPRS is a standardized, automated reporting system developed and maintained by ADPA.

For the purposes of this report, participant and program admission are defined, as follows:

- (1) A participant is an individual who is admitted and becomes actively engaged in an alcohol or drug treatment program.
- (2) A program admission is a treatment event that starts when the program admits the participant.

The Annual Review includes all participants receiving services in ADPA-contracted treatment/recovery programs. This review does not include information on participants who received substance abuse services at facilities operated by federal agencies in Los Angeles County (e.g., the Veterans Administration), crisis intervention facilities (e.g., hospital emergency departments), private entities, and other publicly funded non-ADPA contracted programs. The Annual Review also does not include information on ADPA-contracted prevention programs and their participants.

Acknowledgments:

Special thanks are extended to program providers for their submission of data to ADPA. Without their cooperation and support, the data necessary for the preparation of the Annual Review would not have been possible.

Los Angeles County Treatment/Recovery Programs - - Admissions and Participants

ADPA contracts with community-based agencies to provide a range of treatment and recovery services to County residents with alcohol and drug problems. Each time an individual enters or departs from a program, admission and discharge information is collected. Since a participant may be admitted to more than one program during a fiscal year, or return to the same program more than once, the number of admissions can be greater than the number of individual participants.

Chapter 1 provides participant and admission statistics on the total number of alcohol and drug treatment/recovery programs contracted with ADPA.

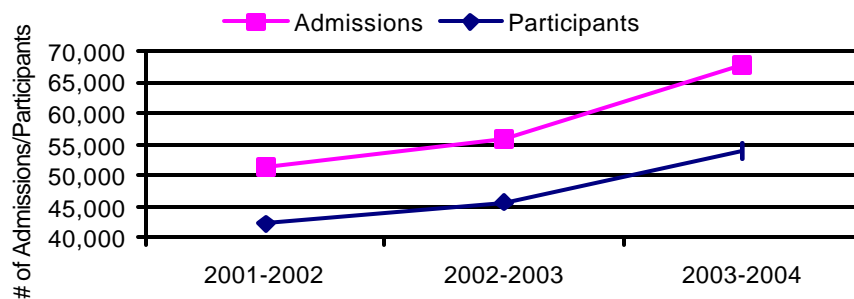

- ◆ The Alcohol and Drug Treatment/Recovery Program provided services to a total of 53,892 participants who accounted for a total of 67,811 program admissions during the 2003-04 Fiscal Year. [Table 1.1]

Table 1.1 - Total Number of Admissions and Participants by Fiscal Year

Fiscal Year	Treatment/Recovery Programs	
	Admissions	Participants
2001-02	51,363	42,314
2002-03	55,814	45,747
2003-04	67,811	53,892

- ◆ Figure 1.1 shows that over three fiscal years (2001-02 to 2003-04), the total annual number of program admissions increased by 32% and individual participants increased by 27%. From 2001-02 to 2002-03, participants and admissions gradually increased and then a sharper increase occurred in 2003-04. This increase may be attributable to an increase in funding and/or participant needs.

Figure 1.1 - No. of AOD Treatment/Recovery Admissions/Participants by FY

- ◆ The characteristics of treatment/recovery participants remained relatively constant over three fiscal years (2001-02 to 2003-04). Most participants were male, most were between 25 and 44 years of age, and most completed between 9 and 12 years of education. [Table 1.2]
- ◆ From 2001-02 to 2003-04, the primary drug problem reported by most participants was alcohol, methamphetamine, or cocaine/crack. One notable change in the primary drug problem reported by participants over these three fiscal years has been the steady increase in methamphetamine use. [Table 1.2]

Treatment/Recovery Programs -- Participant Demographics

Chapter 2 describes the population of 2003-04 Fiscal Year program participants by race/ethnicity, gender, and special target groups, such as homeless individuals, pregnant women, youth under 21 years of age, and needle users.

Several salient points in this chapter are:

Treatment/Recovery Program Participants

- ◆ The overall Los Angeles County Alcohol and Drug Treatment/Recovery Program served a total of 53,892 participants who accounted for 67,811 admissions. [Table 2.1]
- ◆ Three racial/ethnic groups represented 94% of the total participant population (Latino, 40.2%; White, 28.9%; and Black/African American, 24.8%). [Table 2.1]
- ◆ Half (50.5%) of the participants were between 25 and 44 years of age. Most (78.8%) of the participants reported completing 9 to 12 years of education. [Table 2.1]
- ◆ At admission, 82.1% of participants reported they were unemployed. Unemployment was high for both males (78.7%) and females (89.0%). [Table 2.1]
- ◆ Approximately, 1 out of every 5 (18.8%) participants reported being homeless. The percentage of homeless participants was similar for both male (18.3%) and female (19.9%) participants. [Table 2.1]
- ◆ The majority (95.4%) of the participants reported their primary drug problem as methamphetamine (21.2%), alcohol (21.1%), cocaine/crack (19.5%), heroin (17.0%), or marijuana/hashish (16.6%). [Table 2.1]
- ◆ As shown in Table 2.2, the following characteristics were similar for all racial/ethnic groups:
 - the majority were male;
 - the majority had completed 9 to 12 years of education;
 - the majority were unemployed; and
 - most were between 25 to 44 years of age.

- ◆ Among Asian/Pacific Islanders and Whites, methamphetamine ranked as the most frequently reported primary drug problem, 33.3% and 30.7%, respectively. The largest percent of Black/African Americans reported cocaine/crack (42.7%) as their primary drug problem. The most frequently reported primary drug problems reported by Latinos were methamphetamine (24.5%), marijuana/hashish (20.3%), and alcohol (20.0%). Native Americans were most likely to report alcohol (29.6%) or methamphetamine (26.8%) as their primary drug problem. [Table 2.2]

Homeless Participants (Table 2.5)

- ◆ During the 2003-04 Fiscal Year, a total of 10,154 homeless persons participated in alcohol and drug treatment/recovery programs.
- ◆ The majority (64.5%) of homeless participants were male. Most (61.9%) were between 25 and 44 years of age. Over three-fourths (79.0%) reported completing 9 to 12 years of education.
- ◆ Cocaine/crack (28.2%), alcohol (23.8%), methamphetamine (22.5%) or heroin (17.1%) was the most likely primary drug problem reported by homeless participants.
- ◆ Over three-fourths (76.3%) of the admissions for homeless participants were to residential service programs.
- ◆ About one-fourth (23.6%) of the homeless admissions were to non-residential service programs who then referred these participants for such ancillary services as housing, medical, and vocational rehabilitation.

Pregnant Women (Table 2.6)

- ◆ A total of 930 pregnant women participated in alcohol and drug treatment/recovery programs during the 2003-04 Fiscal Year.
- ◆ Most of the women were Latino (39.0%), Black/African American (31.0%), or White (26.2%).
- ◆ The majority (62.7%) were between 25 and 44 years of age and most (81.9%) reported completing between 9 and 12 years of education.
- ◆ One-fourth (26.0%) of pregnant participants reported being homeless at the time of admission.
- ◆ Among pregnant participants, methamphetamine (36.5%) was the most frequently reported primary drug problem, followed by cocaine/crack (23.0%).
- ◆ The majority (68.1%) of the admissions for pregnant participants were to non-residential service programs.

Youth Under 21 Years of Age (Table 2.7)

- ◆ During the 2003-04 Fiscal Year, a total of 10,204 participants under 21 years of age were admitted to alcohol and drug treatment/recovery programs. There were 6,736 under 18 years of age (younger youth) and 3,468 were between 18 and 20 years of age (older youth).
- ◆ Youth participants were more likely to be male (66.9%), Latino (61.3%), and completed between 9 to 12 years of education (80.5%).
- ◆ Three out of 100 (3.1%) reported they were homeless.
- ◆ The majority (52.5%) of youth reported marijuana/hashish as their primary drug problem.
- ◆ Older youth (26.5%) were more likely than younger youth (11.2%) to report methamphetamine as their primary drug problem.
- ◆ The majority (85.7%) of the admissions for youth participants were to programs that provided non-residential services.
- ◆ Older youth (21.6%) were twice as likely to be admitted to a residential program than younger youth (10.4%).

Participants Reporting Needle Use (Table 2.8)

- ◆ During the 2003-04 Fiscal Year, a total of 10,936 (20.3%) participants admitted to alcohol and drug treatment/recovery programs reported using needles to administer drugs.
- ◆ Seven out of 10 (68.5%) needle using participants were male. Most were either Latino (41.1%) or White (40.8%).
- ◆ The majority (54.4%) of participants were between 25 and 44 years of age. Most (80.0%) reported completing between 9 and 12 years of education.
- ◆ Among needle users, unemployment was high (83.4%).
- ◆ One out of 5 (21.3%) needle using participants reported being homeless.
- ◆ Three-fourths (75.2%) reported heroin as their primary drug problem.
- ◆ Most (65.4%) of the participants who reported needle usage were admitted to non-residential services.

Non-Residential Participants (Table 2.9)

- ◆ During the 2003-04 Fiscal Year, 40,055 participants accounted for 47,444 admissions to non-residential service programs.
- ◆ The majority (66.6%) of participants in non-residential programs were male. Most (79.4%) reported completing 9 to 12 years of education.
- ◆ Latinos (43.6%) comprised the largest percentage of participants. There were about equal percentages of White (26.1%) and Black/African-American (24.3%) participants.
- ◆ Most (47.5%) participants in non-residential programs were between 25 and 44 years of age. It should be noted that 15.5% of participants in non-residential programs were less than 18 years of age.
- ◆ Almost one-fourth (22.9%) of the participants in non-residential programs were employed.
- ◆ Less than 10% (8.7%) reported being homeless.
- ◆ For primary drug problem, there were equal percentages for methamphetamine (20.4%), alcohol (20.3%), and marijuana/hashish (20.2%).

Residential Participants (Table 2.10)

- ◆ There were 16,841 participants admitted to residential service programs.
- ◆ Most participants in residential programs were White (36.8%), Latino (32.0%), or Black/African-American (25.8%).
- ◆ The majority (59.3%) of the participants were between 25 and 44 years of age. Most (77.9%) reported completing 9 to 12 years of education.
- ◆ Almost half (46.9%) of the participants in residential programs reported being homeless at time of admission.
- ◆ The majority (65.8%) of the admissions were to long-term (> 30 days) residential treatment/recovery services.
- ◆ About one-fourth (27.2%) of the admissions were to residential detoxification services.

Special Treatment/Recovery Programs -- Participant Demographics

Chapter 3 describes the participants who received services provided by the following special programs during the 2003-04 Fiscal Year:

- ❖ Adolescent Intervention, Treatment, and Recovery Programs,
- ❖ California Work Opportunity and Responsibility to Kids Supportive Services,
- ❖ Drug Court Treatment and Recovery Services,
- ❖ Female Offenders Project,
- ❖ General Relief Mandatory Substance Abuse Programs,
- ❖ Narcotic Treatment Programs,
- ❖ Perinatal Services Network, and
- ❖ Prison Parolee Network

The Substance Abuse and Crime Prevention Act of 2000 (more commonly known as Proposition 36) program and participants are discussed in a detailed report, "Proposition 36 Annual Report 2003-2004" and can be access on ADPA's website, <http://lapublichealth.org/adpa>.

The following describes each special program and highlights several of the findings.

Adolescent Intervention, Treatment, and Recovery Programs

Adolescent programs provide screening, assessment, case management, outpatient and residential services for youth ages 12 to 21 years of age. ADPA contracts with a network of community-based agencies with specific expertise in providing these services using culturally and developmentally appropriate approaches. The service providers also possess the capacities to address the needs of youth with co-occurring mental health and substance abuse problems and of youth involved with the juvenile justice system. The service providers work closely with the Juvenile Court, the Probation Department, schools, and other youth-serving organizations to coordinate services for youth and their families.

Adolescent statistics (Table 3.1) show:

- ◆ Adolescent programs served 2,284 youth who accounted for 2,423 admissions to treatment/recovery services.
- ◆ The majority (69.5%) of adolescent participants were male. Latinos (64.6%) comprised the largest race/ethnic group. The majority (94.7%) of participants were between 14 and 18 years of age. Most (71.4%) youth reported 9 to 11 years of education.

- ◆ Most (62.7%) of the adolescent participants reported marijuana/hashish as their primary drug problem. A higher percentage of participants in residential adolescent programs (40.4%) reported methamphetamine as their primary drug problem compared to those in non-residential programs (11.9%).

California Work Opportunity and Responsibility to Kids Supportive Services

When California adopted the national welfare reform program known as Temporary Assistance to Needy Families (TANF), the State Legislature voted to rename California's welfare reform program California Work Opportunity and Responsibility to Kids (CalWORKs). Under the CalWORKs program, counties may provide additional supportive services to participants including mental health, domestic violence, and substance abuse treatment. These services are designed to remove potential barriers for participants trying to obtain and retain employment.

Participants are pre-screened by Department of Public Social Services staff during CalWORKs intake to determine if there is a possible substance abuse problem. Participants identified with a possible alcohol or other drug problem are referred to ADPA-contracted Community Assessment Services Centers (CASC) for a clinical assessment.

Participants identified with alcohol or other drug problems by CASC are encouraged to participate in a treatment and recovery program. ADPA's network of alcohol and other drug treatment/recovery programs provide services for CalWORKs recipients. Participation in these supportive services is considered a part of the welfare-to-work plan. The time spent in substance abuse treatment and recovery services normally satisfies the participant's weekly program requirement for work or job training and related activities.

CalWORKs statistics (Table 3.2) show:

- ◆ A total of 1,636 CalWORKs participants accounted for 1,801 admissions to alcohol and drug treatment/recovery programs during the 2003-04 Fiscal Year.
- ◆ Eight out of 10 (84.2%) CalWORKs participants were female. The majority (71.9%) of the participants were between 25 and 44 years of age. Most (84.5%) reported completing 9 to 12 years of education.
- ◆ Most CalWORKs participants were Latino (35.8%), Black/African American (33.5%) or White (24.9%).
- ◆ Methamphetamine (32.5%) was the most frequently reported primary drug problem, followed by cocaine/crack (23.0%).
- ◆ The majority (63.0%) of the CalWORKs admissions were to non-residential service programs.

Drug Court Treatment and Recovery Services

Drug Court is a full or part-time court that has specifically been designated and staffed to supervise non-violent drug defendants who have been referred to a comprehensive and judicially-monitored program of drug treatment and rehabilitation services. First established in Los Angeles in 1994, there are currently 13 operational adult Drug Court programs located throughout the County. The Drug Court Judge heads a non-adversarial team of court officers, defense and prosecution attorneys, and treatment counselors to support a participant's recovery through intensive supervision, drug treatment services, frequent drug testing, and court appearances.

Drug Court statistics (Table 3.3) show:

- ◆ During the 2003-04 Fiscal Year, a total of 1,511 participants were enrolled in drug court services and accounted for 1,795 admissions.
- ◆ Most (78.8%) participants were male, most (62.6%) were between 25 and 44 years of age, and most (75.2%) reported completing 9 to 12 years of education.
- ◆ Three groups, Latino (42.0%), Black/African American (32.0%), and White (20.2%), comprised almost all drug court participants.
- ◆ Almost half (48.3%) of the drug court participants reported cocaine/crack as their primary drug problem.
- ◆ Six out of every 10 (60.9%) of the drug court participant admissions were to non-residential service programs.

Female Offenders Project

This project represents a joint effort by the California Department of Corrections, California Department of Alcohol and Drug Programs, and ADPA. The Female Offenders Project was first implemented during the 1989-90 Fiscal Year. Female inmates from the California Institute for Women in Frontera, who are paroled to Los Angeles County, voluntarily participate in community-based residential alcohol and drug treatment/recovery for up to six months.

Female Offenders Project statistics (Table 3.4) show:

- ◆ A total of 83 participants were admitted to this project during the 2003-04 Fiscal Year.
- ◆ Black/African Americans (43.4%) constituted the largest race/ethnic group, followed by Whites (32.5%).
- ◆ The majority (72.3%) of participants were between 25 and 44 years of age. Most (83.1%) participants reported completing between 9 and 12 years of education.
- ◆ Six out of 10 (57.8%) participants reported being homeless.
- ◆ Most (47.0%) of the participants reported cocaine/crack as their primary drug problem.

General Relief Mandatory Substance Abuse Programs

Existing State law (California Welfare and Institutions Code section 17000 et.seq) requires counties to maintain a general assistance program for indigent persons. Indigent persons are defined as adults, 18 years of age and older, who have no source of income or means of providing for their basic needs such as food, shelter, and clothing. In Los Angeles County, this program is known as General Relief. Effective November 1997, all adult applicants applying for General Relief are required, as a condition for eligibility, to be screened during their intake interview to determine if there is a reasonable suspicion that he or she may have a substance abuse problem. These individuals are referred to an ADPA-contracted Community Assessment Services Center (CASC) for a professional evaluation, and, if appropriate, for urinalysis screening. Participants assessed and identified with alcohol or other drug problems are required to participate in a substance abuse treatment/recovery program in order to continue to receive General Relief benefits.

General Relief statistics (Table 3.5) show:

- ◆ During the 2003-04 Fiscal Year, a total of 5,260 participants were reported as welfare recipients and accounted for 5,584 admissions to alcohol and drug treatment/recovery programs funded by General Relief.
- ◆ Most (66.9%) participants were male, most (62.0%) were between 25 and 44 years of age, and most (80.9%) reported completing 9 to 12 years of education.
- ◆ General Relief participants were Latino (39.4%), Black/African-American (31.3%), or White (23.2%).
- ◆ About one-third (31.8%) of the General Relief participants reported being homeless.
- ◆ General Relief program participants were most likely to report alcohol (27.9%), methamphetamine (24.9%), or cocaine/crack (24.2%) as their primary drug problem.
- ◆ The majority (68.8%) of General Relief admissions were to programs that provided non-residential treatment/recovery services.

Narcotic Treatment Programs

These programs provide a range of services using methadone or levo-alpha-acetylmethadol (LAAM) medication for detoxification and/or maintenance of opiate dependent individuals. Services may include intake and assessment, body fluid testing, group and family counseling, crisis intervention, and participant follow-up.

There are two types of narcotic treatment program services:

1. Detoxification services administer or furnish methadone/LAAM in decreasing doses for a period not to exceed 21 days to assist an individual's withdrawal from dependency on heroin or other morphine-like drugs.
2. Maintenance services administer methadone/LAAM, accompanied by ancillary medical and social services for individuals 18 years of age or older with a history of two or more failures in alternative treatment services.

Narcotic Treatment Program statistics (Table 3.6) show:

- ◆ A total of 6,552 participants accounted for 8,875 admissions to Los Angeles County Narcotic Treatment Programs during the 2003-04 Fiscal Year.
- ◆ Overall, the majority (69.5%) of narcotic treatment program participants were male. Most (79.8%) reported completing 9 to 12 years of education. Over one-fourth (27.9%) of the participants were employed. Most participants were either Latino (42.6%) or White (37.6%).
- ◆ There were 5,217 admissions to narcotic treatment detoxification services. Nearly three-fourths (73.1%) of the 3,369 participants were male. Most (82.7%) completed between 9 and 12 years of education. One-fourth (25.4%) of the participants reported being employed.
- ◆ During the 2003-04 Fiscal Year, a total of 3,183 participants received narcotic treatment maintenance services. Two-thirds (65.7%) of the participants were male. Most (76.8%) reported completing 9 to 12 years of education. Three out of 10 (30.5%) participants were employed.

Perinatal Services Network

This program was developed through the collaborative efforts between the California Department of Alcohol and Drug Programs and ADPA. The Perinatal Services Network provides a wide array of alcohol and drug treatment/recovery services designed to assist pregnant and parenting women and their children in establishing and maintaining clean and sober lifestyles. Treatment and recovery options include: long-term residential treatment, day care habilitative services, outpatient counseling, case management services, transitional housing, and sober living services.

Perinatal Services Network statistics (Table 3.7) show:

- ◆ During the 2003-04 Fiscal Year, Perinatal Services Network provided services to 1,337 female participants who accounted for 1,443 program admissions.
- ◆ Black/African Americans (39.9%) and Latinos (34.4%) accounted for three-fourths of the participants receiving perinatal services. The majority (71.9%) of participants were between 25 and 44 years of age. Most (81.5%) completed 9 to 12 years of education.
- ◆ Nearly one-third of the participants reported either methamphetamine (32.6%) or cocaine/crack (32.0%) as their primary drug problem.
- ◆ Two-thirds (66.0%) of the Perinatal Network participants received services from a non-residential intensive day care program.

The Los Angeles Area Services Network (also known as the Prison Parolee Network)

The Prison Parolee Network is the result of a collaborative effort of the California Department of Corrections, California Department of Alcohol and Drug Programs, and ADPA. Male and female offenders, paroled to Los Angeles County, voluntarily participate in an ADPA-contracted alcohol and drug treatment/recovery program for up to six months. Treatment includes residential, outpatient, and alcohol/drug-free living center services.

Prison Parolee Network statistics (Table 3.8) show:

- ◆ A total of 606 participants accounted for 708 admissions to the Prison Parolee Network during the 2003-04 Fiscal Year.
- ◆ Most (86.1%) participants were male. The majority (71.5%) of the participants were between 25 and 44 years of age. Most (83.5%) completed 9 to 12 years of education.
- ◆ A third (33.3%) of the participants reported being homeless at time of admission.
- ◆ The largest number of participants reported cocaine/crack (36.1%) as their primary drug problem. Methamphetamine (28.4%) ranked second.
- ◆ Prison Parolee Network admissions were about equally distributed between non-residential and residential services, 51.5% and 48.6%, respectively.

Treatment/Recovery Programs -- Participant Statistics By Service Planning Areas

Chapter 4 describes the Alcohol and Drug Treatment/Recovery Program and its participants by each of the eight Los Angeles County Service Planning Areas (SPAs). The statistics provided in this chapter should not be used, as need indicators. The number and types of alcohol and drug treatment services (private, ADPA-contracted, and other public-funded) are not available at the same level in each SPA. As a result, the mix of specific participant groups and program types may vary for each SPA.

SPA Background

In 1992, the Children's Planning Council noted that County departments had conflicting geographic service regions, which created barriers to the delivery of integrated services. To address this issue, the Children's Planning Council brought together representatives from key County departments and other non-county entities. This effort resulted in the approval of eight Service Planning Areas by the Board of Supervisors on November 16, 1993.

Note that each alcohol and drug program participant was assigned to a SPA based on his or her residential zip code. SPA statistics represent the number of residents residing in a SPA who received treatment at an ADPA-contracted alcohol and drug program. SPA statistics do not include program participants who were homeless at the time of admission and those residents who received alcohol and drug treatment services from programs not contracted with ADPA. Therefore, these SPA statistics do not completely reflect the level of incidence and prevalence of alcohol and drug problems in a SPA.

The following are several findings in this chapter:

- ◆ The proportion of male (67%) and female (33%) participants served by ADPA-contracted programs is similar in each SPA.
- ◆ The most frequently reported primary drug problem of participants residing in SPA 1 - Antelope Valley (30.6%), SPA 3 - San Gabriel (32.9%), and SPA 7 - East (31.4%) was methamphetamine. [Table 4.1]
- ◆ About one-third (31.8%) of participants who resided in SPA 6 - South reported cocaine/crack as their primary drug problem. [Table 4.1]
- ◆ Heroin was the most frequently reported primary drug problem of participants from SPA 4 - Metro (28.2%) and SPA 5 - West (31.2%). [Table 4.1]
- ◆ Most participants were between 25 and 44 years of age, with 9 to 12 years of education in all eight SPAs. [Tables 4.2 to 4.9]

Treatment/Recovery Programs -- Participant Statistics By Agency

Chapter 5 provides a description of program participants by agency. During the 2003-04 Fiscal Year, ADPA contracted with 152 agencies that provided treatment/recovery services to 59,479 participants. Note, a participant can receive treatment/recovery services from more than one agency during the fiscal year. Therefore, the number of participants shown in this chapter is greater than the number of participants shown elsewhere in this Review.

Table 5.0 lists each agency alphabetically and shows the number of participants and admissions reported during the fiscal year. The second part of the chapter (Tables 5.1 through 5.152) provides participant demographics for each of the 152 agencies.

Several salient points regarding contracted agencies are:

- ◆ ADPA contracted with 24 new community-based agencies during the 2003-04 Fiscal Year. New community-based agencies are noted with an asterisk in Table 5.0. The majority of these new agencies provided Drug Medi-Cal services.
- ◆ Of the 152 agencies, 11 served only female participants and 6 served only male participants. These gender-specific agencies are listed below:

List of Agencies Serving Only Female Participants

<u>No.</u>	<u>Table</u>	<u>Agency Name</u>	<u>SD*</u>	<u>SPA**</u>

Treatment/Recovery Programs -- Discharge Status

Chapter 6 describes the discharge status of participants departing from the Alcohol and Drug Treatment/Recovery Programs.

Discharge information is collected when the planned treatment/recovery services are no longer being provided to the participant or when there is a change in the type of services being provided. Program staff use one of the following four State-defined standard discharges to describe the participant's status at the point of departure from a program:

1. Completed Treatment/Recovery Plan Goals –
The participant successfully completed the recovery plan and met the major goals identified. The participant was not referred or transferred to any other alcohol or drug program.
2. Left Before Completion with Satisfactory Progress –
The participant did not complete the program, but was in recovery services long enough (in the judgment of the provider's staff) to make significant progress toward achieving the goals identified in the recovery plan. The participant was not referred or transferred to any other alcohol or drug program.
3. Left Before Completion with Unsatisfactory Progress –
The participant dropped out of the program or was dismissed from recovery services.
4. Referred or Transferred for Further Alcohol/Drug Treatment/Recovery –
The participant was referred or transferred to another program or facility to continue recovery services.

Note that a participant is often transferred from residential services to non-residential services as he/she progresses in their treatment plan. Also, transfers from non-residential to residential services may occur if a participant requires more intensive treatment.

The following are several noteworthy findings in this chapter:

Overall

- ◆ During the 2003-04 Fiscal Year, 43,675 participants were discharged from treatment/recovery programs. [Table 6.1]
- ◆ Overall, 24.0% of all participants at discharge were reported to have "completed treatment." [Table 6.1]
- ◆ Overall, 14.3% of participants left the program with a discharge status of "referred or transferred for further treatment/recovery services". [Table 6.1]

Residential Programs

- ◆ A total of 15,886 participants were discharged from residential programs during the 2003-04 Fiscal Year. [Table 6.1]
- ◆ Over one-third (35.7%) of the participants departing from residential programs successfully completed treatment. [Table 6.1]
- ◆ A discharge status of "completed treatment" was more likely among participants who were employed (58.8%). [Table 6.6]
- ◆ Almost half (47.3%) of the participants who reported alcohol as their primary drug problem "completed treatment". [Table 6.7]

Non-Residential Programs

- ◆ During the 2003-04 Fiscal Year, there were 27,789 participants discharged from non-residential programs. [Table 6.1]
- ◆ Seventeen percent (17.4%) of the participants in non-residential programs "completed treatment". [Table 6.1]
- ◆ Program completions were similar for both employed and unemployed participants, 21.1% and 16.3% respectively. [Table 6.12]
- ◆ Program completions were the lowest for participants who reported heroin (12.2%) as their primary drug problem. [Table 6.13]
