**SAPC INFORMATION NOTICE 22-01**  
*Supersedes IN 21-08*

January 1, 2022

**TO:** Los Angeles County Substance Use Disorder  
Prevention and Treatment Network Providers

**FROM:** Gary Tsai, M.D., Division Director *AT*  
Substance Abuse Prevention and Control

**SUBJECT:** **NOVEL CORONAVIRUS (COVID-19) RESPONSE**

The Department of Public Health’s (DPH) Division of Substance Abuse Prevention and Control (SAPC) thanks its provider network for its continued dedication and commitment to those they serve amidst the unprecedented challenges presented by the coronavirus (COVID-19) pandemic. Your ongoing services and adaptations to minimize transmission risk consistent with DPH guidance are saving lives and helping to reduce the toll of COVID-19.

This Information Notice (IN) provides important updates from SAPC’s prior IN 21-08 released on October 1, 2021 and includes the latest information available concerning the evolving situation around COVID-19. SAPC will continue to release updates as new information and guidance become available in order to keep its provider network informed. Staying informed of changes will be particularly important as more of the State’s waivers and allowances implemented early in the pandemic are set to expire in the coming weeks and months.

**Implementing Safety Efforts**

In light of the risks of COVID-19 to our patients, staff, and communities, providers must ensure their staff and patients are informed about the symptoms of COVID-19 and implement appropriate preventative efforts to reduce the spread of the virus within their facilities. Providers need to continue to develop or update policies and procedures, as well as emergency plans, to address health issues like COVID-19 and ensure ongoing operations and appropriate delivery of services during these times.

The science and knowledge related to this virus continues to evolve. As such, providers and particularly frontline staff must continually stay informed of the COVID-19 situation by reviewing and posting (in common areas) the resources available on the [DPH COVID-19 Webpage](#), which includes the most recent [Health Officer Order](#) as well as information tailored for Health Care

Facilities such as substance use disorder (SUD) prevention and treatment providers, Congregate Living Facilities such as residential treatment programs, and other general information. To ensure your staff and patients are fully informed as well, you must post COVID-19 educational materials appropriate to your setting in all relevant threshold languages within common areas at each facility. LA County has developed helpful signs that are available at the [Best Practices to Prevent COVID-19](#) Guidance for Business and Employers website. Additionally, steps should be taken to continue enhanced sanitation/cleaning efforts and reduce the proximity of individuals to each other, particularly in residential, inpatient, and Recovery Bridge Housing settings.

### **Assessing for Medical Stability**

To balance SUD service needs and community health, individuals who are medically stable still need to be admitted for medically necessary treatment services. This includes individuals who are exhibiting symptoms that overlap with COVID-19 (e.g., cough, fever, shortness of breath) and who could be appropriately quarantined and/or isolated, in accordance with DPH guidance. Whether or not the benefits of receiving SUD services outweigh the risks to both the individual receiving treatment and the community must be considered on a case-by-case basis. For example, individuals with un- or under-treated SUDs may not return to care and may suffer morbidity or mortality as a result of their substance use and/or exacerbate community spread if they were turned away from needed residential SUD treatment as opposed to being isolated in a residential setting. However, medically *unstable* individuals should always be immediately referred to appropriate health care services.

### **Reporting of COVID-19 Positive Cases**

All providers are required to report positive client or staff COVID-19 tests as follows:

1. **SAPC:** Report every client or staff who tests positive for COVID-19 to SAPC at any site or level of care by submitting the [Adverse Event Reporting Form](#) to [sapcmonitoring@ph.lacounty.gov](mailto:sapcmonitoring@ph.lacounty.gov) within one (1) business day.
2. **DPH:** Report three (3) or more client or staff COVID-19 positive tests at any site or level of care (i.e., prevention, treatment, DUI) in a 14 calendar days span to DPH using the following link [www.redcap.link/covidreport](http://www.redcap.link/covidreport) and/or by calling (888) 397-3993 or (213) 240-7821 if internet access is not available.
3. **DHCS:** Report every client or staff who tests positive for COVID-19 at any site or level of care (i.e., prevention, treatment, DUI) to the California Department of Health Care Services (DHCS) within one (1) business day to [DHCSLCBcomp@dhcs.ca.gov](mailto:DHCSLCBcomp@dhcs.ca.gov).

### **Substance Use Prevention and Treatment Community-Based Services**

Your agencies provide essential health care services to the residents of Los Angeles County.<sup>1,2</sup> Additionally, SAPC's Substance Abuse Service Helpline (SASH), Client Engagement and Navigation Services (CENS) and Connecting to Opportunities for Recovery and Engagement (CORE) Centers remain open and continue to see a high volume of individuals seeking care. By staying open and accessible during this ongoing public health emergency, and diligently

---

<sup>1</sup> DHCS Stakeholder Letter, Clarifying the Urgency of Essential Critical Infrastructure Workers

<sup>2</sup> DPH Safer at Home for Control of COVID-19

implementing DPH health and safety guidelines to reduce COVID-19 transmission, you support those struggling with substance use and their loved ones.

As essential health care services, SUD network providers must ensure that any person eligible for SAPC services seeking treatment can access it, including those who may be symptomatic or positive for COVID-19.

- *Residential, Inpatient, and Recovery Bridge Housing Settings:*  
Continue to isolate and quarantine patients in accordance with the current DPH Health Officer Order and associated guidance, with the understanding that bed capacity may be reduced because symptomatic and COVID-19 positive patients are in isolation or under quarantine. However, vacant beds need to be filled in accordance with physical distancing requirements.
- *Outpatient Settings:*  
We encourage your agencies to deliver an appropriate balance of in-person and telehealth services to support the needs and preferences of patients including maintaining appropriate in-person availability care for during business hours for walk-in patients.
- *Opioid Treatment Programs (OTP):*  
During the COVID-19 emergency period, OTPs may offer take-home dosing at the discretion of the Medical Director if the OTP submits a letter of need to DHCS for review and approval, even if minimum treatment standards are not met. See [DHCS' OTP FAQ](#) for more information on service modifications during the pandemic.
- *Driving Under the Influence (DUI) and Penal Code 1000 (PC1000):*  
Continue delivery of services in the same manner as outpatient settings, including expanded use of telephone and telehealth and modifications for in-person groups as outlined below. The State has sunset blanket leave of absences (LOA) and thus programs must resume compliance with California Code of Regulations (CCR) Title 9, Division 4, Chapter 3, §9876.5. SAPC is resuming collection of fees for clients enrolled after July 1, 2021 from DUI and PC 1000 providers. Refer to the [DHCS IN 20-016](#) for more details.
- *Syringe Exchange Programs (SEP):*  
Continue delivery of needle exchange supplies and services to prevent the transmission of other communicable diseases during this time and ensure availability of overdose prevention medications.
- *Client Engagement and Navigation Services (CENS):*  
Continue delivery of navigation, referral and connection services at co-locations and all sites now need to be open for in-person services. Telephone or telehealth can temporarily be used for screening, connection, and follow-up during this emergency period if requested by the referring entity. If services are delivered at an alternate location, or services are delivered via telephone or telehealth, it must be documented in the notes section of the Service Connection Log.
- *Prevention Services:*  
Prevention Services also remain important components in the care continuum to address individual and community health during and after the pandemic period. As such, prevention providers need to balance the delivery of both in-person and remote services

to best meet the needs and preferences of the populations served. Group activities for Prevention Services via telehealth or telephone remain a service option and include public-facing platforms inclusive of Facebook Live, Twitch, TikTok, and similar video communication applications for efforts that are not associated with an individual- or group-based processing/counseling sessions. These platforms on public-facing platforms are not allowable for treatment service given federal prohibitions.

### **Participants for All In-Person Group Activities**

Previously instituted temporary limitations on patient education and group counseling sessions have been lifted. Adherence to State and County guidance regarding masking and social distancing still applies.

### **Service Hour Expectations**

Providers need to adhere to the minimum service hours for outpatient, intensive outpatient, residential and withdrawal management services. When patients are unable to attend as outlined or indicated on the Treatment Plan, this should be documented in the client chart and available for review and evaluation during monitoring activities. Providers also need to ensure that appropriate patient and staff signatures are obtained for required documentation per regulation (see “Telehealth and Telephone” section for more information).

### **Telehealth and Telephone – Flexible Service Options**

To encourage continued patient participation and reduce COVID-19 transmission, DHCS is continuing telehealth and telephone allowances until December 31, 2022. This temporary allowance includes the initial American Society of Addiction Medicine (ASAM) assessment and consultations between counselor and Licensed Practitioners of the Healing Arts (LPHA) to establish medical necessity, as well as all subsequent services after the establishment of medical necessity, in accordance with State allowances. Importantly, this includes:

- Documentation must be included if services are delivered via telehealth or telephone; all other SAPC required documentation remains in place.
- Ink or electronic signatures are not required if it is documented that the patient is participating via telephone or telehealth due to COVID-19.
- Providers must obtain and document verbal or written consent before the use of telehealth or telephone services as outlined in Business Professions Code section 2290.5 (b).
- Calls do not need to originate from a Drug Medi-Cal (DMC) certified site during this COVID-19 emergency period.
- Allowable staff positions, working within their scope of practice, may deliver services via telehealth and/or telephone (i.e., assessment, treatment planning, crisis intervention, individual counseling, group counseling, collateral services, case management, Recovery Support Services, patient education) in any location that maintains patient confidentiality and patients may participate in telehealth services at any location of their choice.
- The consultation between physician/LPHA and SUD counselor to review the assessment to establish the SUD diagnosis, medical necessity and level of care assignment may be conducted through a face to face, telehealth, or telephone discussion.

- Certain services, such as residential services, require a clearly established site for services and in-person contact with a beneficiary in order to be claimed. However, the California Plan does not require that all components of those services be provided in-person. For example, services via telephone for a patient quarantined in their room in a residential facility due to illness.

Although providers may offer services as described above, ***they may NOT close offices and must remain open unless otherwise directed according to the DPH COVID-19 response, as SUD treatment is considered an essential service.***

During this public health emergency period, federal guidance has modified restrictions on allowable telehealth platforms for treatment services, and will remain permissible until modified by the [federal](#) or [State](#) government:

- ***Temporarily Allowable Platforms:*** Non-public facing popular video chat applications include Apple FaceTime, Facebook Messenger video chat, Google Hangouts video, Skype, and Zoom.
- ***Non-Allowable Platforms:*** Facebook Live, Twitch, TikTok, and similar public facing video communication products. Though providers may continue to operate under the temporarily allowable platforms, SAPC strongly encourages providers to utilize a HIPAA-Compliant communication platform.

### **Staff Vaccination, Testing and Masking**

[SAPC Bulletin 22-02](#) provides further guidance on the County's and DHCS's vaccine mandates. Please refer to that bulletin for the most current requirements and guidelines.

### **Personal Protective Equipment, Other Essential Supplies, and Testing**

SAPC providers will need to ensure continued and sufficient supply of Personal Protective Equipment (PPE) equipment for use during the COVID-19 pandemic and beyond. PPE includes, but is not limited to, surgical masks, face shields, gloves, gowns, and eye protection; and other essential supplies which includes, but is not limited to, non-medical cloth face coverings, infrared thermometers, and hand sanitizer.

All providers need to implement ongoing policies and procedures that educate new staff and patients about the COVID-19 vaccination options and use of appropriate PPE to mitigate transmission. Efforts need to be made to facilitate patient access to the COVID-19 vaccine if desired.

### **Funding Support for Continued Treatment Service Delivery**

As noted in IN 21-08, cost-based payments will no longer be issued effective December 31, 2021 and effective January 1, 2022 reimbursement will return to settlement at the lesser of costs or charges (i.e., cost reconciliation) for treatment services.

### **Compliance Monitoring**

SAPC has resumed standard monitoring practices and has incorporated the use of uploading documents to a Secure File Transport Protocol (SFTP) to ensure the secure and safe sharing of

information. Providers will be given a minimum of two (2) weeks to prepare documents and upload to the system to allow for Compliance staff to review. The use of file uploads has increasingly become the standard way of sharing documents among providers and oversight agencies, including DHCS. Providers must adhere to this process as mandated by the provisions of their SAPC contract(s).

### **Site Closures or Service Reductions**

Accessing SUD services during this public health emergency may be more critical for some patients to reduce the risk of relapse. Providers must ensure that services described in your SAPC Agreement, with the considerations and allowances described in this document, remain in effect. In accordance with the SUSPENSION OR TERMINATION FOR DEFAULT section of your agreement, the County may suspend or terminate a contract if the contractor fails to perform any contracted services.

For service hour reductions or temporary site closures, providers must submit a request which includes the justification for why such service reductions or closures are necessary, a plan to resume contracted business hours, and how the provider will ensure the ability to continue to provide services, including admitting new patients. Providers must submit an electronic letter addressed to Dr. Gary Tsai, Division Director, and emailed to Daniel Deniz, Branch Chief – Finance Services Branch, at [ddeniz@ph.lacounty.gov](mailto:ddeniz@ph.lacounty.gov) prior to, or immediately upon, changes that outlines the emergency procedures and duration. SAPC's Contracts and Compliance Branch staff will reach out to the impacted provider and sites.

### **Effective Period**

This public health emergency continues to evolve and SAPC will update this Informational Notice as new information becomes available. This guidance will be effective starting January 1, 2022 and will remain in effect until further revision and notification.

### **Additional Information**

If you need additional information, please contact your assigned Contract Program Auditor who will provide a response or direct you to the most appropriate SAPC Unit.

Summary of Department of Health Care Services (DHCS) COVID-19 Flexibilities Sunset Dates  
 See DHCS Information Notices (IN) and Frequently Asked Questions (FAQ) Applicable to Counties and Contract Providers  
 Updated: 12/31/21

**Background**

During the COVID-19 Public Health Emergency, the State Department of Health Care Services (DHCS) allowed various regulatory flexibilities to ensure access to specialty substance use disorder (SUD) services. With the improvement of the COVID-19 situation, many of these flexibilities will be sunsetting. Please visit [DHCS' Information for Providers & Partners](#) page for additional details. Below is a summary of the flexibilities and sunset dates. See DHCS IN [20-016 \(DUI\)](#), [20-017](#), [NTP FAQ](#) for more information.
