

OVERVIEW

To comply with Department of Health Care Services (DHCS) guidelines, when billing H0033 for 3.2-WM, the National Drug Code (NDC) information must be entered for the Medication Assisted Treatment (MAT) medication that is being administered and observed. While agencies may administer non-MAT medications to clients while in 3.2-WM, DHCS only allows for H0033:U9 to be submitted with MAT medication NDCs.

The SAPC Rates Matrix includes a list of NDCs in the “MAT NDCs” tab that are accepted by DHCS. Before billing, providers must verify that the NDC of the administered MAT medication appears in the applicable fiscal year Rates Matrix.

Primary Sage Users using Sage-PCNX to complete billing must complete the Fast Service Entry Submission form section labeled “NDC - H0033 3.2-WM only.” This section collects the required NDC information when submitting H0033 services under 3.2-WM.

Secondary Sage Users must use the 837 HIPAA transaction process to ensure proper formatting and information is included in the 837 files submitted to SAPC as indicated in the current 837 companion guides.

BILLING H0033 IN 3.2-WM IN SAGE (PRIMARY SAGE USERS ONLY)

Completion of the Fast Service Entry Submission Form with NDC Information

In the Fast Service Entry Submission form, go to the Fast Service Detail screen and enter the service information as required for all services, then navigate to the section labeled “NDC – H0033 3.2-WM only.” Use the information from the medication packaging and the dosing amount administered to the client to complete the fields.

1. In the **National Drug Code (837-2410-LIN-03)** field, enter the 11-digit NDC found on the medication packaging. Confirm that the NDC appears in the “MAT NDCs” tab of the SAPC Rates Matrix. If the NDC does not appear on the Rates Matrix, it is not an accepted NDC by DHCS and cannot be billed under H0033.

National Drug Code (837-2410-LIN-03)

2. In the **Quantity (837-2410-CTP-04)** field, enter the quantity of the medication administered.
 - a. Refer to the medication packaging to determine the correct dose and unit of measure (e.g., mL, mg, units, gram or IU). *For example, for NARCAN 4 MG NASAL SPRAY, enter “4” in the field. The unit of measurement (mg) is entered in the following field.*

Quantity (837-2410-CTP-04)

3. In the **Unit or Basis of Measurement (837-2410-CTP-05)** field, click the radio button for the measurement type associated with the medication quantity (e.g., milliliters, milligrams, grams, units, or international units).

a. For example, for NARCAN 4 MG NASAL SPRAY, select “Milligram.”

Unit or Basis of Measurement (837-2410-CTP-05)

<p>National Drug Code (837-2410-LIN-03)</p> <input style="width: 95%;" type="text" value="00093216568"/>	<p>Unit or Basis of Measurement (837-2410-CTP-05)</p> <table style="width: 100%; border: none;"> <tr> <td><input type="radio"/> International Unit</td> <td><input type="radio"/> Gram</td> </tr> <tr> <td><input checked="" type="radio"/> Milligram</td> <td><input type="radio"/> Milliliter</td> </tr> <tr> <td><input type="radio"/> Unit</td> <td></td> </tr> </table>	<input type="radio"/> International Unit	<input type="radio"/> Gram	<input checked="" type="radio"/> Milligram	<input type="radio"/> Milliliter	<input type="radio"/> Unit	
<input type="radio"/> International Unit	<input type="radio"/> Gram						
<input checked="" type="radio"/> Milligram	<input type="radio"/> Milliliter						
<input type="radio"/> Unit							
<p>Quantity (837-2410-CTP-04)</p> <input style="width: 95%;" type="text" value="4"/>							

BILLING H0033 IN 3.2-WM VIA 837 FILE (SECONDARY SAGE USERS ONLY)

To ensure proper submission of NDC information for H0033 in 3.2-WM, Secondary Sage Users must include the following 837 loop and its segments as specified in the SAPC [837P Companion Guide](#). Use the information from the medication packaging and the dosing amount administered to the client to populate the required loops and segments. If the NDC does not appear on the Rates Matrix, it is not an accepted NDC by DHCS and cannot be billed under H0033.

Required Loops and Segments for NDC information

Example of Completed Loop and Segment:

```
LIN**N4*63323024910~
CTP***07*ML~
```

Loop 2410 – Drug Identification

1. LIN Segment – Drug Identification

- **LIN02** must contain the qualifier “N4” indicating National Drug Code
- **LIN03** must contain the 11-digit NDC with no hyphens or spaces

2. CTP Segment – Drug Quantity

- **CTP04** must include the quantity of the medication administered
 - This refers to the quantity of the medication administered. Refer to the medication packaging to determine the correct dosage amount. For example, for NARCAN 4 MG NASAL SPRAY, the value would be “4.”
- **CTP05** must include the unit of measure (e.g., ML, ME, UN, etc.)
 - This specifies the measurement type associated with the medication quantity (e.g., milliliters, milligrams, grams, units, or international units). Please select the appropriate measurement type. For example, for NARCAN 4 MG NASAL SPRAY, the value would be “ME.”
 - Allowable values are: F2 - International Unit, GR - Gram, ML - Milliliter, UN - Unit, or ME - Milligram ([Table 1](#)).

Table 1. CTP05 - Measurement Types & Codes

CTP05 Value	Measurement Type
F2	International Unit
GR	Gram
ML	Milliliter
UN	Unit
ME	Milligram
